

Upward-pulling cable trays

Use to assist pulling cables along non basket-style cable trays. Designed to aid load forces during cable pulls especially right before 90° bends and offsets without taking space up inside the tray.

Cable tray length is selected based on the load to be supported, the distance between the supports (also referred to as the span), and handling and installation constraints.

iTOOLco's 10? Cable Tray Rollers install in three easy steps and are compatible with more construction substrates than the competition.

Each FLEXIPASS delivers friction-free, pass-through for your fragile fiber optic and large cables. Less damage and easier ergonomic pull.
