The CS optical connector is a new generation of high-density, very small form factor (VSFF) connectors that are 40% smaller and more space-efficient than duplex LC connectors.

What is a CS Connector? The CS connector, short for "Compact Small form-factor Connector," is a type of fiber optic connector designed for high-density ...

Panduit has launched the CS Connector, a high-density fiber connector solution that optimizes the data center for next generation applications. Its compact size enables breakout mode options and ...

The CS is a Very Small Form Factor (VSFF) connector and is ideal for space-saving solutions. The CS connector allows you to double the density in patch panels compared to an LC duplex.

This can be achieved through using small form factor connector systems like Compact Scrambling (CS) Connectors, which support multiple connections per unit area while maintaining ...

The CS connector is the next-generation, high-density CS connector that supports data rates up to 400Gb/s and 800Gb/s. CS connectors provide significant space savings of ~40% over LC ...

CS Connector - Compact Simplicity by Senko & Sumitomo The CS connector, co-developed by Senko and Sumitomo, was the earliest LC-mini replacement optimized for QSFP-DD ...
