

Why can't we buy fiber optic cables

Fiber internet offers unparalleled speed and reliability, yet its widespread availability remains a significant challenge. This article delves into the intricate reasons why fiber optic infrastructure hasn't ...

Fiber cables and glass are in short supply. FBA and Superior Essex spoke with Fierce about how the constraints could impact BEAD and data center builds.

With tariffs driving up the cost of imported fiber optic cables, supply chains are getting squeezed. That's a problem, considering fiber optics are the backbone of modern communications, ...

As networks and data centres have expanded rapidly across the Globe, fibre demand has far exceeded supply, resulting in tighter inventories, longer delivery times, and higher prices. That is ...

But despite fiber optic cable offering a host of benefits, such as higher bandwidth, low latency, and a higher degree of reliability, flexibility and security than its copper cable alternative, it ...

In today's environment, reliable access to fiber optic products is more important than ever. Whether you're overseeing a data center upgrade, telecom project, or enterprise network expansion, ...

The demand for optical fibre cabling isn't going anywhere, and according to the latest CRU data, it will outpace supply sometime in the next twelve months, says Paul Atkinson, CEO - ...

All of this highlights why fiber optic cables have become such an overlooked strategic resource, one that the U.S. currently can't produce enough of to meet domestic demands.

Learn about the challenges facing the cable industry and how Corning is lowering deployment barriers and helping deploy faster, cheaper, and better fiber networks.

A shortage of fiber-optic cable equipment is blamed on AI data center demands as well as US protectionism.

Why can't we buy fiber optic cables
