

Why doesn't North Korea have fiber optic cable factories

The real internet is also available in North Korea, but primarily only to its elite citizens. These are reportedly families with direct ties to Supreme Leader Kim Jong-un.

OverviewService providers and accessGovernment use of the InternetSouth Korean Internet regulationsIP address rangesSee alsoExternal linksInternet access in North Korea is available from Internet service provider Star Joint Venture Co., a joint venture between the North Korean government's Ministry of Post and Telecommunications and Thailand-based Loxley Pacific. Star JV took control of North Korea's Internet address allocation on 21 December 2009. Prior to Star JV, Internet access was available only via a satellite link to Germany, or for some government uses through direct connections with China Unicom. Almost all of North Korea's Internet tr...

With the support of the UNDP, North Korea's fiber optical cable construction started off by connecting Pyongyang and the regional cities. Now the fiber-optic cable networks expand throughout the nation.

Some telecom-technology reporting stresses that North Korea's connectivity is limited by aging or secondhand infrastructure and by practical limits of coverage .

"North Korean people cannot use it, not because of the infrastructure or not because of the country's poor conditions," says Nam Bada, the secretary general of Pscore and editor of the report....

Based on this information, Nick predicts that the fiber optic cable from Russia crosses the Tumen River into North Korea, then connects to Pyongyang via the east coast (on the Sea of...

North Korean press reported in 2000 that fiber-optic cable had been extended to the port of Nampho and that North Pyongan Province had been connected with fiber-optic cable.
