

Why is the router only providing 60Mbps when the fiber optic cable is 200Mbps

I had a 1gig fiber connection installed but speeds are only showing around 170mbps. They WERE reading between 5-30mbps but I uninstalled and reinstalled my network driver and while ...

To prevent your router from "bottlenecking" your network, we recommend using a router that's capable of faster speeds than your Internet connection. To see how much bandwidth your ISP ...

If I got fiber and didn't upgrade my network, I'd still never see speeds past 1 Gbps. Until I upgraded my switches to at least 2.5 GB Ethernet, my higher download speed was trapped inside ...

Like with your devices, your speeds will only be as fast as your router and Wi-Fi signal will allow them to be. If you know your router can support gigabit speeds, but you aren't getting the ...

Bottlenecks within your connection can matter a lot more. Fiber can improve the connection coming into your home, but it can't automatically fix what happens after that signal ...

It's always worthwhile to try a different Ethernet cable as part of troubleshooting! Check for switches or routers between the ONT and the Pace 5268AC that may potentially be limiting speeds.

It wasn't even a cheap router, it has lots of functions, but for some reason, it can't get past 200Mbps DL speed anymore. During all these tests I used various cables, so I don't think this ...

A: 300 Mbps refers to the WLAN internal link speed between the router and the computer, it is different from the actual internet speed. The internet speed is mainly limited by the lowest speed in the ...

Remove the router and connect your PC directly to the fiber ONT and test. I would probably be sure your PC has the default NIC settings, as you seem to have been messing with ...

Edit: Issue is resolved. It turned out the ethernet cable was bad. I replaced with a new ethernet cable that came with the gateway and it fixed the issue.

Why is the router only providing 60Mbps when the fiber optic cable is 200Mbps
